Installation Information

Trim cone to suit pipe size using sharp tin snips.

With clip in downstream position, wrap top of cone around pipe and engage metal teeth in opposing pockets starting at the top.

To assist locating clip into pocket, place hand behind seam. Fasten clip with pliers or mulitgrips, working from top to base.

Apply sealant to underside of Dektite base and shape to roof by hand.

Fasten flashing down and secure clip by placing a fastener either side of clip first.

crimp closure and any other potential leak areas.

Always use the neutral cure low modulus silicone for sealing In corrosive and coastal environments fix using blind aluminium rivets
